Profile

A highly motivated and versatile professional with experience in the financial industry. I possess a strong aptitude for problem-solving and excel in leveraging structured methodologies to analyze complex data sets. Recognized for my ability to identify trends and extract valuable insights, I consistently contribute to data-driven decision-making processes. With a natural curiosity and open-mindedness, I actively seek out new methodologies and tools to optimize financial analysis and enhance client outcomes as a financial advisor or junior data analyst.

Work Experience

○ 2019 – 2023

NHP Hypotheken, Waddinxveen

Mortgage / Financial Advisor

Helping people with their financial situation with a main focus around their mortgage and related products. Some activities are: Assessing peoples financial situation, exploring mortgage options, comparing mortgage products, application assistance, liaising with lenders, providing financial advice, monitoring and support.

In addition to the main working activities mentioned above: I'm also active in maintaining and implementing (new) IT tools, like HDN-certificates and API's.

○ 2016 – 2019

Combinass, Woerden

Insurance Advisor (private & business)

Assisting people and businesses with selecting and managing insurance policies that best meet their needs and mitigate risks. Some activities are: Assessing insurance needs, providing insurance recommendations, researching and comparing insurance plans, assisting with policy management, staying updated on insurance trends

○ 2008 – 2016

Self-employed

Support Designer / Engineer (oil & gas industry)

Design and draft supporting systems for pipelines in on- and offshore industries. Working together with multiple departments from start to finish. From building designs in 3D model software, drafting construction drawings till doing on-site checks. Some companies I worked for are: Jacobs Engineering (Antwerp), CB&I (The Hague), SMB Offshore (Schiedam), IV Oil & Gas (Papendrecht).
